Expressions of Interest for Construction of Drainworks and Associated works
Procurement Ref: DICL/Q/06/2022-23/OIB

Clarification No.1

Further to the queries received from Bidders for the above-mentioned invitation, our replies are as follows:

Query No. 1:

The Scope of work includes "Investigation, Cadastral and topographical Survey, Preparation of Detailed working Plans & Drawings, Longitudinal Sections, Hydraulic designs & drawings, Structural designs drawings and Construction of Storm Water Drainage Network, Improvement of Outfalls among others as per guidelines from the Land Drainage Authority (LDA) which is a local authority mandated to spearhead all drainage facilities in Mauritius and relevant international codes and best practices including 2 years of defect liability period under the Red Book Contract, the design and BOQ shall be submitted by the DICL.

Please clarify: Is the Applicant/Contractor OR the Client (DICL) will be responsible for the Investigation, Cadastral and topographical Survey, Preparation of Detailed working Plans & Drawings, Longitudinal Sections, Hydraulic designs & drawings, Structural designs drawings? If this in under the Applicant/Contractor responsibility, will it conflict with the Red Book Contract? If this in under the Client's responsibility, is a Investigation, Cadastral, topographical Survey or Sub-Consultancy (design partner) required from the Applicant/Contractor in this EOI and the later RfP stage?

Reply:

The DICL under the Red Book is responsible for the design and the Applicant/Contractor is responsible to carry out actual topographical survey and preparation of detailed working plans and drawings for implementation of works.

Investigation, Cadastral, topographical Survey or Sub-Consultancy (design partner) are not required from the Applicant/Contractor in this EOI.

Query No. 2:

For 7.2 ii For the Topographical and cadastral surveys and wayleave, a land surveying firm having adequate experience in such works may be employed.

Please clarify: Is this forms part of the technical staff's requirement? If so, what maybe the experience requirement? Or the Applicant/Contractor has similar working experience/capacity will meet your requirement?

Reply:

Yes, it forms part of the technical staff's requirement and who shall possess a minimum of 5 years' experience in Civil Engineering Works.

Query No. 3:

For Applicant's Information, Associations (Joint Venture or Sub-consultancy) and relevant Form attached.

Please clarify: If a Sub-consultancy, such as an engineering/design partner, should be identified at this stage? If the Applicant/Contractor can meet the shortlisting criteria though itself and being shortlisted by your authority, is it allowed for the Applicant/Contractor to engage an engineering/design partner at RFP stage as its sub-contractor?

Reply:

A Sub-consultancy, such as an engineering/design partner is not required at this stage.

Bidders are requested to take into consideration the clarifications when preparing and submitting their proposals.
